## PROJECTS

### BikeSwoon - Front End Web Development

[Demo](#) | [Code](#)

- **Web Development:** A React web application built on CRUD principles, which replicates an online ordering interface and provides users with the ability to create accounts, offering a variety of options.
- **Database Management:** Integrated Google Firebase for User Authentication and Database Management, enabling administrative control capabilities through console
- **Design Planning:** Leveraged Figma to create a comprehensive visual representation of the project's initial design, offering a clear and intuitive workflow direction.

## WORK EXPERIENCE

### UPS | Package Handler

OCT 2020 - Present

- **Collaborative Efficiency:** Collaborated with team members to meet daily loading targets and ensure timely departures for delivery, demonstrating attention to detail and efficiency in a fast-paced working environment
- **Data Accuracy:** Utilized scanning equipment and software to accurately track package movement and reduce the incidence of misplaced or misdelivered packages, enhancing customer satisfaction.
